## **Department of Computer Engineering**

### **Report on Theatre Based Personality Development**

Computer Engineering department of MMIT Lohgaon organized three days workshop on 'Self-Improvement' for students of B.E. Computer from 7<sup>th</sup> July to 9<sup>th</sup> July 2016 between 10.00 a.m. to 4.00 p.m. at Seminar Hall .

The programme has focused on self-motivation, self-confidence, management of emotions such as fear and anger, problem solving and decision making skills, and positive thinking.

Students have learned step-by-step, systematic methods to enhance their personality through discussions, group activities, questionnaires, individual exercises and practice sessions. An exercise has been held for individual assessment.

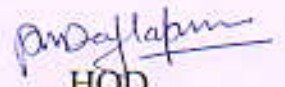

Educating student in the arts has shown in brain-based research to improve several cognitive skills. When students create original stories through film, for example, they're creating new content from prior learning. This is known as meta-cognition, and Bloom's Taxonomy ranks it as the best possible learning outcome. Arts can provide all kinds of benefits for students, from intellectual to creative to social-emotional.

While sports are a great way to impart certain skills, the competition involved often turns off several children and leads them to feelings of failure. On the other hand, collaborative and per formative arts like Film and Theatre, are a great way to impart these skills to student because they not only engage and challenge them, but also provide opportunities for interaction, personal expression and play.

This workshop is designed by Mr. Amarjeet Amle in the group of 40 students.
