Activity Report  
**Awareness of Global Warming**

Date: 28/1/2016

**Activity:** Awareness of Global Warming

**Date:** -26/01/2016

**Venue:** Lohgaon

**Organized By:** Mechanical Engineering Department

**No of Participant:** - 50

**Aim of Activity:** To create awareness of Global Warming

**Details:**

Awareness of Global Warming activity was carried out by mechanical Engineering department for creating awareness in the peoples about Global Warming. Global warming is the increase of earth's average surface temperature and its oceans due to greenhouse gases released as people burn fossil fuels. These greenhouse gases such as carbon dioxide and methane absorb heat that would otherwise bounced off the Earth's surface. Global warming has emerged has one of the biggest environmental issue in the last two decades.

As per NASA, "the global average surface temperature rose 0.6 to 0.9 degrees Celsius (1.1 to 1.6° F) between 1906 and 2005, and therate of temperature increase has nearly doubled in the last 50 years. Temperatures are certain to go up further." It seems that the temperature is rising at a rate faster than ever before. Human activities like burning of fossil fuels, deforestation, industrialization and increase in pollution are considered as few of the factors responsible for rise in global warming.
