**DEPARTMENT OF MECHANICAL ENGINEERING**

**Activity Report**  
**No Plastic Bags**

Date: 17/08/2015

**Activity: No Plastic Bags**

**Date: -15/08/2015**

**Venue: Lohgaon**

**Organized By: Mechanical Engineering Department**

**No of Participant: - 40**

**Aim of Activity:**

- To generate awareness and improve the efficiency of welfare services intended for girls
- To arrest the decline in girl child sex ratio and promote women's empowerment in order to improve the women status in the country

**Details:**

Single-use plastic shopping bags litter our environment, harm wildlife and require valuable resources to manufacture. The Northern Territory, South Australia and Tasmania have also banned single-use plastic shopping bags. More states and territories will likely follow.

The ban has reduced plastic bag use, with shoppers encouraged to bring their own bags. Overall the ban has reduced the volume of plastic bag waste going to landfill by around one-third.

The ban applies to all retailers in the ACT for single-use, lightweight polyethylene polymer plastic bags that are less than 35 microns in thickness (these are the thin plastic bags with handles that were typically supplied at supermarkets check-outs). The ban does not apply to other bags such as barrier bags for fruit and vegetables.

The ACT's plastic bag ban was reviewed through community surveys. The survey reported that:

- more than 70% of people surveyed did not want the ban overturned
- 65% of Canberra grocery shoppers supported the ban for environmental reasons and agreed it had a positive effect on the environment.

Approved by AICTE and Affiliated to PCCO Maharashtra State Board of Technical Education

**MECHANICAL DEPARTMENT**

**SAY NO TO PLASTIC**

**Why we avoid use of plastic -**

Plastic objects are made of a non-renewable resource, which gives us more reasons to use recyclable shopping bags.

Plastic bags clog roadside drains, which could cause the flooding of the street at heavy rainfalls.

Plastic is hazardous to wildlife animals, if they are not disposed properly.

It has been observed that dumping of plastic waste may deteriorates soil and underground water quality due to leaching of additives, colour, stabilizers and fillers present in the different categories of plastic products.

**NO PLASTIC .... GO GREEN**

**Activity Outcomes:-**

1. Students will be able to understand Plastic bags remain toxic even after it breaks down.
2. This activity helps student to know the fact only 1 to 3% of plastic bags are recycled worldwide.
3. Students will understand Plastic bags are produced using petroleum, natural gas and other chemicals. Its production is toxic to the environment.
