Department of Mechatronics Engineering

Course Name: Human Machine Interface
Class: BE Mechatronics Engineering
Course Code: 417551 B (2019 Course)

Course Outcomes:

On completion of the course, the students will be able to

1. Design innovative and user-friendly interfaces for industrial application.

2. Criticize existing interface designs, and improve them.

3. Design application for social and technical task with safety concern
