Entrepreneurship Program - Project

(E Cell IIT Bombay)

After the successful completion of the 4 sessions covering major aspects of analysing any startup, you are now ready to test yourself by applying the same concepts in the real world. This project is aimed to make you think, revise, apply and question the ideas discussed by the speakers and more importantly force you to think upon the consequences of each decision and the path that follows it.

Feel free to use any resources from the sessions or any books or the internet to research and survey facts or to find new ideas and possibilities.

RECORDINGS OF THE SESSION:

Session 1 : https://drive.google.com/file/d/1AlkiEhyurmo_eP_XaSI19tprPo7YksDM/view?usp=sharing

Session 2 : https://drive.google.com/file/d/1OjPZrp1-lyvz2IC_nQbL2wnuyYM3ucXf/view?usp=sharing

Session3: <https://drive.google.com/file/d/1V4v5SdQTdWugn3AVTV-wGeAWmah2aDpx/view?usp=sharing>

Session 4 : <https://drive.google.com/file/d/1kMeAQcrK8hd49JR2Mh77qDzliuqHNeR8/view?usp=sharing>

PROJECT SUBMISSION GUIDELINES:

- The deadline to submit the project is 17th July 11:59 P.M.
- The submission has to be made into a .pdf file and uploaded on the submission portal at <https://www.ecell.in/enspace/enpro/>
- On the submission portal, fill the same details as submitted during registration

PROJECT:

Choose any company which started as a startup (atleast 10 years old is recommended so that more data is available for answering the questions).

Now put yourself in the shoes of the founder of that company in the initial stage of the company. You have the same product and same resources at hand. Think through what you would do in such a scenario to get through the stages of Idea Validation, Constructing Business Model, and raising funding for the startup.

After that, analyze how the company proceeded with these things in reality and create a map of evolution of the company in both cases and compare which of your changes play out to be better and which play out to be worse.

For each factor, try to reason the outcomes through different angles. Try thinking from the founder's and customer's perspective alternatively i.e think about the actions the company takes in the short term and the impact it creates on the user base in the long term. Then reanalyze your work through this iterative process.

The submission can be in the form of paragraphs for each part OR a series comparison by tabular bullets OR a mixture of charts and texts. You can use a BMC template to explain the 2 models too. Just convert any file you have to submit into PDF format before submission.

For eg. If you chose a company in the 1980s, you have to factor in components like the economic condition of the country of origin, no public access to PCs or internet, the trends that were popular at that time and the general perception of the public. These factors can play in your favour or against you depending on the product and country, but because the aim is learning, try to be as thorough and honest as possible. List the factors included with reasoning for your presumed hypothesis.

Here are some questions you can ask yourself to get started -

- What other products or services were available in a similar domain?
- What are the pain points of the customer that the product can solve? And how can this be conveyed to the customer working under the restraints of the current technology and budget?
- Will this pain persist in the future or does the product need to be modified with time to keep up with newer technology and preferences?
- What should be the primary focus of the company? Should it be revenue generation, leading innovation, serving a community or something else?
- Is the market ready for the product or is too disruptive and needs extensive marketing before launch?
- How should the product be priced? (Considering the paying capacity of the customer and the demand of the product over other competing products, which can be analyzed based on a unique selling point)
- How sustainable is the business model and what is its volatility based on other dependent factors?

NOTE - This is an open ended project with no right or wrong answer. Peer discussion encouraged but plagiarism of any kind is unenthused.

PROJECT:

Company name: Zomato

Idea Validation: Idea is that many people stand up in que for lunch during lunch time at hotels. Need to reduce/eliminate this problem

Business Model: Provide such people the food at their place at the additional cost.

Funding: Initially it will be run at local level. Hence less fund needed to operate. Vehicle and trained staff will need costing. Loan could be better option.

Evolution: At local level response was good. But need more area capturing, hence need immediate expansion, which was not planned. Hence, need more staffing and training. Also need of improvement in app. More local advertisement. Then trying in more area. First order discounts and some other benefits to customer to attract more numbers. Customer need more offers and more different menus. Hence need of more connected hotels and snack centers.

Funds are less hence can think of raising funds through partnership or IPO.

Competitors entered in market. Need more attractive offers to be given to customers.
