Department of Mechatronics Engineering

Report on

Donation Activity - on 9th November 2023

Introduction:

On 9th November 2023, a donation was made to the Mechatronics Engineering Department of Marathwada Mitra Mandal’s Institute of Technology, Lohgaon specifically aimed at supporting the welfare of the department's peon. The donation was initiated by teaching faculty of the Mechatronics department as part of an ongoing effort to recognize and assist the staff members who play an essential, though often unsung, role in the smooth operation of the department.

Details of Programme:

- **Date:** on 9th November 2023
- **Time:** 10.45 am
- **Venue:** EMD Lab no 2 , MMIT Mechatronics Department
- **Participants:** 7
- **Organized by:** Department of Mechatronics Engineering
- **Coordinator:** Mr. V.V.Kulkarni and Ms. Sonali S Patil

- **Purpose of the Donation:** The primary goal of the donation was to provide financial or material support to the peon, who is integral to the daily functioning of the Mechatronics Engineering Department. The peon, who assists with a variety of tasks such as maintaining cleanliness, delivering messages, setting up classrooms, and managing logistics, has consistently demonstrated dedication and hard work in ensuring the department operates efficiently.

Details of the Donation:

- **Amount/Value:** The donation was valued at 1200/-
- **Type of Contribution:** The donation was made in the form of money.
- **Recipient:** The donation was intended for peon Mr Sachin Patil
- **Date of Donation:** The donation was presented on 9th November 2023.

Rationale Behind the Donation: Staff members like the peon contribute significantly to the department's operations, yet their efforts often go unrecognized. By providing this donation, the donors sought to acknowledge the hard work and dedication of the peon and to offer financial relief or support. It is also an expression of appreciation for the crucial, but sometimes overlooked, role that non-academic staff play in maintaining the day-to-day functionality of educational institutions.

Impact of the Donation: The donation has had a positive impact on the recipient, providing both moral and material support. This gesture not only alleviated some of the financial burdens faced by the peon but also highlighted the importance of valuing all staff members in the academic community. It is hoped that such initiatives will inspire similar acts of kindness and recognition across the institution, fostering a culture of inclusivity and appreciation.

Conclusion: The donation made to the Mechatronics Engineering Department's peon serves as a reminder of the importance of recognizing the contributions of all individuals within an organization. This act of kindness has not only provided practical assistance but also reinforced

the values of community and mutual respect within the department. Moving forward, it is recommended that similar initiatives be organized regularly to ensure that all staff members, regardless of their roles, are valued and supported.
