Do you feel the existing curriculum fulfill the industrial requirement? If No, please suggest inclusion in curriculum for enrichment, skill development and aptitude building

126 responses

Yes

NA

Na

yes

No

Yes

no

-

.

..

I think aptitude building and interview communication also resume building should payed more attention.

No. More practical experience and field visits or some kind of internship

need to increase practical knowledge about course studies

Promote internship

No, not included current or latest industry standards practical education and knowledge which can help in career and job.

Yes

Focusing on the coding language and its frameworks can improve the curriculum.

No, studies should be base in trending technologies

Mostly

N.A

Yes, it does fulfill.

Y

No, please prepare students for application based studies.

No, they should mostly focus doing the practical than writing the practical assignment

Yes but include more practical knowledge

No, in the existing curriculum mostly focus on writing,like assignment and practical, it's need to change by writing practical to doing the practical

More practical knowledge needed.

There should be dedicated classes for personal grooming and aptitude building , also, i believe students lack in comm skills so they should be encouraged to speak English or else be provided basic English speaking knowledge

Ok

The existing computer engineering curriculum does a good job of covering the fundamentals of computer science and engineering. However, there are a few areas where it could be improved to better meet the needs of industry.
Here are some suggestions below.

- 1) Hands-on projects: These projects should give students the opportunity to apply the theoretical concepts they learn in class to real-world problems. They should also be designed to help students develop their problem-solving and teamwork skills.
- 2) Industry internships: Internships are a great way for students to gain real-world experience and make connections with potential employers. They should be encouraged to apply for internships in a variety of industries, so that they can explore different career paths.
- 3) Soft skills training: Courses on communication, teamwork, and problem-solving should be included in the curriculum. These courses can help students develop the skills they need to be successful in the workplace.

NA

No

No, as the university should remove unwanted and redundant subjects and they should start focusing on adapting syllabus that gets updated every year.

More Add-on courses should be include

More conceptual and practical oriented contents need to be introduced that can actually be useful for students who'd enter the highly competitive job market in future

No because most of the industry were asking about the latest framework s in the present computer field but our current curriculum does not include anything about such framework

There should be inclusion of industry related job trainings. They should focus on taking handson practice of coding on various coding platform, rather this should be treated as a specific subject in students curriculum.

Students should get the clear understanding what industry require from them and how they can be a part of IT industry even though they don't have coding knowledge.

Good

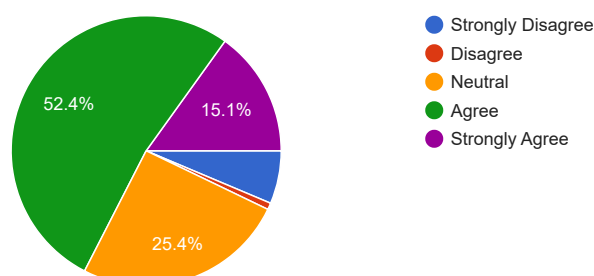

no, realtime experience, practical knowledge, English speaking course

More practical sessions should happen for Cloud Computing, Linux skills, and DSA

How do you rate Institute contribution towards creating awareness about contemporary issues for betterment of society (social responsibility, humanities, soft skill)?

126 responses

What did you learn during graduation that is most applicable (useful, most vital) to your current position?

126 responses

Useful

NA

Na

.

Yes

.

No

Communication skills

Everything

-

NA

Technical things whatever was there in my course

Design of transmission system is very useful as I am interested in Automotive industry

Socialization , and technical knowledge that is helpful in my company role

Manufacturing Process

I learn all the new things in the graduation

Site visit

Vital

Being up to date with the industry level values

Programming languages and some basic practical programming

Computer knowledge

Useful

Learned lot of things

Campus To Corporate session

- Java and teamwork maybe!

everything

Patience is most important thing for success

Extra curricular activities

Study by your self

Computer skills

N.A

Be+ve

To gain more knowledge always. And not to stop studying.

Learning and reasoning skill

Team Work, Communication, Problem Solving, Leadership, etc

Social Awareness and Management

Coding practices and communication

It was good to study in this college

Everything about construction

better communication and good performance

-

I learnt technologies ..

Professional knowledge

time is the most important thing

Coding skills and technical knowledge due to hackathons and competition

Leader qualities, and the management

Hard work, passionate about our dreams

Communication, confidence

Soft skills

Practical experience

Technical Skills

Technical skills

Very useful

Confidence , Stage courage

Time management

I'm pursuing post graduation degree so, I find the way teachers told us to handle pressure , that helped me a lot

To work in a group and take everyone's perspective grant.

Ehnansing currier in civil

Communication

Interpersonal skills, personality development, active participation.

Actual industry training

yes

Computer Science concepts

Confidence, knowledge about companies, extra curricular knowledge

Team work.

Soft skills and better knowledge of each and every subject

..

...

Apart from academics we have participated in different cultural and sports events because of which I personally achieve a level of confidence and social skills that I was lacking in.

most vital

Patience

Social skills

All knowledgeable things

Networking

how to deal with stressful situation

Nothing

Domain knowledge and interaction with with outside world

Applying for masters

to be active

Most of the basics are clear about the computer

Time Management

Most useful education

Start upskilling yourself right from first yr

Training placement cell was effective

Discipline

supporting staff

Communication skill

Probably Aptitude for company exams

Industry standards and requirements

Soft skills and hardwork

Good

..

Soft skills

nothing

DSA , OOPS

Nothing much, most of the things are learnt by getting your hands dirty, institute should ask students to do open source contributions.

Please express your views on strengths, weaknesses, areas that need improvement, Opinions on Facilities /Utilities etc. briefly

126 responses

NA

Na

No

.

na

-

.

Nothing

None

Good facilities

na

I don't see any weaknesses. Strength is the placement department

No improvement needed

No Suggestion

i Think no need to improvement all facilities are good

Need to increase placement ratio

Pls improve the teaching methods and take most practical work

Faculty should try to teach subjects with higher level of practicality

Good teaching

Have to add good knowledged staff and celebrate every college function at good level and pls concerns more companies for selection of students job and make them happened

Practical training and education needed

Good and supporting staff

Need to work on every aspect a little bit

Pros:

- All first-year faculty members are the best and most supportive
- equal concern for both practical and theoretical knowledge
- good infrastructure and campus with all facilities

Cons:

- Department teachers are more theory-oriented
- quick deadlines for assignments

Hshsh

No improvement needed

Good teaching, but less practical teaching skill

N.A

Na

Strengths are faculties and their approach towards excellency in students knowledge.

No one

Increase visit on sites

Communication skills, stage daring

B

Nothing

Training and Placement

I think apart from curriculum students need to be guided on areas such as problem solving skills, group practices, faculties need to guide them like at least solve 4-5 logic questions every day so that students' logical thinking will improve.

Everything is excellent

I am a hardworking person.

-

It's already sufficient

Communication between the college and alumni could be improved.
A need for more up-to-date curriculum to align with industry trends.

Training placement

Good opinion

Focus on Practicals

Improve industrial experience

Very good

Knowledge and details about syllabus curriculum

Mock interviews for good placements

No improvement needed the institute is very good in academics and also very supportive in sports also

Faculty experience should be more.

Need to provide good facilities related to teaching, campus drive.

yes

All good

Nothing as such.

NA

Training and placement

...

Facilities should have more attention towards soft skills and apart from academics should pay attention towards cultural activities.

no

Communication skills are very good and help ful nature

Good

More experience in respective subjects

All needs improvement

Very good

No need

Already mentioned and there should be more interactions with industry people.

Teaching faculty is the strength and more technological operations improvement iis needed to make students ready for future opportunities.

Nil

Need to cover more latest framework

improvement of canteen infrastructure, college roads

Teaching process should be made more lively

Everything is fine

Confidence

Students need more resources to get the knowledge apart from library

Coding knowledge

Good

Very useful

Facilities

No all Is good

..

Everything is good

Training and placement

need to change faculty

Remove HOD of comp

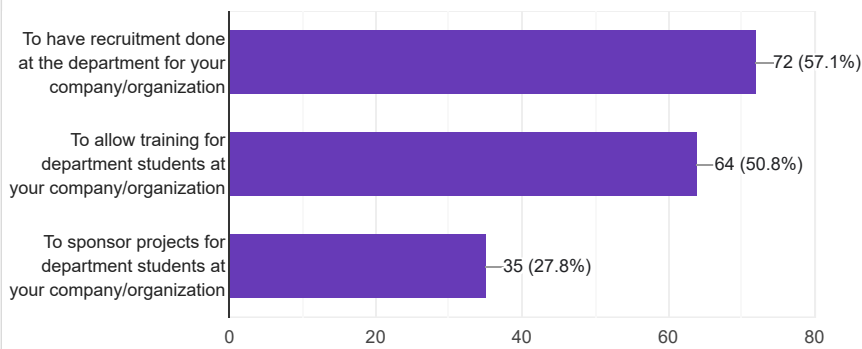

Facility wise everything is sufficient

Do you have Willingness of following? Please tick.
