Improve Lab Quality And Make sure The all Devices Are Work Properly, Sometimes Devices are not works properly and students cannot perform the practical at a time

Improve no of pc's in software lab pc's not work properly

The no. of Field and industry visits are very less. Field and Industry visits should be done more frequently.

noo

Need to be improved

n/a

Great lab setup

none

Good learning

Field visits and industrial visit are moderate in nature its expected to be much more so exact process of engg materials can be understood

Best teacher

Please conduct Anubhuti event's

overall teaching is excellent.

Should be focused on practicals more than the theoretical part

Not too good and not too Bad also

no suggestions

No suggestions for teachers

Should encourage internship extensively

for now there are no events for us mostly and we got to hear about the sports events but they are after college hours so bus students cant take part and not all teachers are good at teaching some(specific) teacher only tells story in most of the time and spend lot of time scolding people and teach for only 15 minuites out of 60

.....

If a student pays the full fees, then Wi-Fi facilities should be provided to them.

All Teachers are good and supportive but I face issues to understand PPS Because mam can only said theory in oral and very fast

....

Thank

No any suggestions

NA

No

Nope

Syllabus is not covered neatly and notes are also not provided on time please give on time .

This institute is improving many things in learning but far more to go

Teach by the 3D visuals on smart board etc. And focus on understanding over a writing

Nope

Teach more challenges from real world and support students with there role and discipline them to complete there goals on time ,also best thing teach time management

25

Yes Teacher have to communicate personal to solve our problems and value our small /big problems they must understand our problems they must make friendly environment in class rather than making student stress environment

more options can be added in feedback form to select from to make it fair. rather than just positive and neutral answers

No any suggestions

No suggestion all good

A division classroom projector is not good we need smart board classroom

Teachers should encourage students and help them to become confident

Should focus on clearing the basic concepts.

Plz also focus on other curricular activities as well .

Any

Teachers use student centric methods such as Experimental learning, Participative learning, Problem solving methodologies for enhancing learning experiences. Should look after

Please introduce NCC into the college as extra curricular activities also for CCC

Plz conduct events rather than study we need some refreshment.

The current academic schedule from 8 AM to 4 PM is very long and continuous, which often causes mental fatigue among students and reduces their concentration during the later lectures. Because most of the day is spent attending classes, students are not getting sufficient time for self-study, revision, completing assignments, and preparing for exams. Engineering students also require time to work on technical skills, personal projects, internships, coding practice, and other career-development activities, but the present timetable makes it difficult to focus on these important aspects. In addition, students are unable to actively participate in sports, cultural activities, clubs, and other extracurricular activities that are essential for overall personality development. Having many lectures in a single day also reduces learning efficiency, as students tend to become tired and less attentive in the final lectures. The current structure feels very similar to a strict school-like system, whereas college education should ideally provide a more flexible environment that encourages independent learning and exploration. Furthermore, the schedule lacks sufficient breaks between lectures,

which could help students relax and refresh themselves before the next class. Continuous academic pressure without enough free time may also lead to stress, burnout, and health concerns among students.

More real world problems and practical sessions should be conducted.

No any

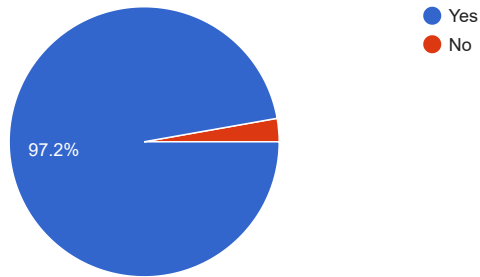

not even marks distribution of CCE

### Ambience

Does Institute provides ICT enabled Smart Classrooms

 Copy
